

Attorney Docket: XY Frozen RCE-Express Mail No: EV 168806490 US

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

n Re the Application of:

John L. Schenk

Serial Number:

09/478,299

Filed:

January 5, 2000

Parent Title:

Method of Cryopreserving Selected Sperm Cells

Group Art Unit:

1654

Examiner:

M. Meller

Assignee:

XY, Inc.

SUBMISSION UNDER 37 C.F.R. § 1.114

Assistant Commissioner for Patents Box RCE Washington, DC 20231

The Applicant formally withdraws from appeal of the above-identified application and hereby the following submission under 37 C.F.R. 1.114, as a Request for Continued Examination. This Request for Continued Prosecution responds to the concerns raised in the official communication mailed December 18, 2002. The applicant further submits an Information Disclosure Citation to consolidate the references originally cited by the applicant and those cited by the examiner in prior official communications.

SUBMISSION

Pursuant to 37 C.F.R. §1.121, the applicant submits a clean set of claims as amended. The applicant has consolidated all separate amendments to the claims into a single clean version which is to be construed as a cancellation of all previous versions of the claims with respect to this application. The applicant respectfully requests entry of the clean version of the claims as set forth beginning on the next separate page:

A method of freezing sex-selected sperm cells, comprising: 38. obtaining sperm cells from a male of a species of mammal (a)

sorting said sperm cells based upon sex-type;

(b) cooling sex-selected sperm cells; (c)

isolating a portion of said sex-selected sperm cells; (d)

suspending said portion of said sex-selected sperm cells in an extender and

freezing said sex-selected sperm cells in said extender to provide fertile (f) sex-selected sperm cells upon thawing.

The method of freezing sex-selected sperm cells as described in claim 38, wherein 39. said sperm cells from said species of said male mammal comprise bovine sperm cells.

The method of freezing sperm cells as described in claim 39, wherein said step of 40. isolating a portion of said sex-selected sperm cells comprises isolating a number of bovine sperm cells between about 300,000 and about 3,000,000.

The method of freezing sperm cells as described in claim 39, wherein said step of 41. isolating a portion of said sex-selected sperm cells comprises isolating a number of bovine sperm cells of no more than about 1,000,000-

The method of freezing sex-selected sperm cells as described in claim 38, wherein 42. said sperm cells from said species of said male mammal comprise equine sperm cells.

The method of freezing sex-selected sperm cells as described in claim 42, wherein 43. said step of isolating a portion of said sex-selected sperm cells comprises isolating a number of equine sperm cells between about 1,000,000 million and about 25,000,000.

The method of freezing sex-selected sperm cells as described in claim 42, wherein 44. said step of isolating a portion of said sex-selected sperm cells comprises isolating a number of equine sperm cells of no more than about 5,000,000.

- 45. The method of freezing sex-selected sperm cells as described in claim 38, wherein said step of cooling sex-selected sperm cells comprises reducing the temperature of said sex-selected sperm cells to about 5°Celsius.
- 46. The method of freezing sex-selected sperm cells as described in claim 45, wherein said step of reducing the temperature of said sex-selected sperm cells comprises reducing the temperature of said sex-selected sperm cells over a period of about 60 minutes to about 240 minutes.
- The method of freezing sex-selected sperm cells as described in claim 38, wherein said extender further comprises a component which maintains osmolality and buffers pH.
- 48. The method of freezing sex-selected sperm cells as described in claim 47, wherein said component which maintains osmolality and buffers pH is selected from the group consisting of a buffer comprising a salt, a buffer containing a carbohydrate, and any combination thereof.
- The method of freezing sex-selected sperm cells as described in claim 47, wherein said component which maintains osmolality and buffers pH is selected from the group consisting of sodium citrate, Tris[hydroxymethyl]aminomethane, N-Tris]hydroxymethyl]methyl-2-aminoethanesulfonic acid, monosodium glutamate, milk, HEPES buffered medium, and any combination thereof.
- The method of freezing sex-selected sperm cells as described in claim 47, 48, or 49, wherein said extender has a pH in the range of about 6.5 to about 7.5.
- 51. The method of freezing sex-selected sperm cells as described in claim 47, wherein said extender further comprises a cold shock protectant.

52. The method of freezing sex-selected sperm cells as described in claim 51, wherein said cold shock protectant is selected from the group consisting of egg yolk, an egg yolk extract, milk, a milk extract, casein, albumin, lecithin, and any combination thereof.

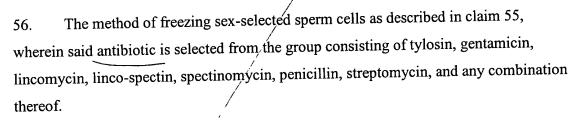

53. The method of freezing sex-selected sperm cells as described in claim 51, wherein said extender further comprises an energy source.

54. The method of freezing sex-selected sperm cells as described in claim 53, wherein said energy source is selected from the group consisting of a saccharide, glucose, fructose, mannose, and any combination thereof.

55. The method of freezing sex-selected sperm cells as described in claim 53, where it said extender further comprises an antibiotic.

57. The method of freezing sex-selected sperm cells as described in claim 47,51, 53, or 55, wherein said extender further comprises a cryoprotectant.

58. The method of freezing sex-selected sperm cells as described in claim 57, wherein said cryoprotectant is selected from the group consisting of disaccharides, trisaccharides, and any conbination thereof.

59. The method of freezing sex-selected sperm cells as described in claim 57, wherein said cryoprotectant is selected from the group consisting of glycerol, dimethyl sulfoxide, ethylene glycol, propylene glycol, and any combination thereof.

- 60. The method of freezing sex-selected sperm cells as described in claim 38, wherein the extender in which said portion of said sex-selected sperm cells is suspended comprises glycerol, sodium citrate, Tris[hydroxymethyl]aminomethane, egg yolk, fructose, and one or more antibiotics.
- The method of freezing sex-selected sperm cells as described in claim 38, wherein the extender in which said portion of said sex-selected sperm cells is suspended comprises glycerol, sodium citrate, egg yolk, and one or more antibiotics.
- The method of freezing sex-selected sperm cells as described in claim 38, wherein the extender in which said portion of said sex-selected sperm cells is suspended comprises glycerol, egg yolk, milk, fructose, and one or more antibiotics.
- 63. The method of freezing sex-selected sperm cells as described in claim 38, further comprising the step of equilibrating said portion of said sex-selected sperm cells suspended in said extender prior to freezing over a period of about 1 hour to about 18 hours.
- 64. The method of freezing sex-selected sperm cells as described in claim 38, further comprising the step of equilibrating said portion of said sex-selected sperm cells suspended in said extender prior to freezing over a period of not greater than 6 hours.
- 65. A frozen sex-selected sperm sample in accordance with the method of claim 38.
